

## Neotame and Neotame-D5

Neotame is a dipeptide methyl ester derivate and was approved by EFSA. It is a sweetener and flavour enhancer in foodstuff and is allowed in the European Union since January 20<sup>th</sup> 2010. It is known by the E number E961. Its systemic name is N-[N-(3,3-dimethylbutyl)-L- $\alpha$ -aspartyl]-L-phenylalanine-1-methyl ester and the sweetness factor is approximately 7000 to 13000 times greater than that of sucrose.

We are proud to present you Neotame and Neotame-D5 as analytical standards with a purity greater than 98%.

Product name	Neotame
CAS-No	165450-17-9
Article No.	RCG-367
Formula	C <sub>20</sub> H <sub>30</sub> N <sub>2</sub> O <sub>5</sub>
Molecular weight	378.46g/mol
Purity	≥98%
Pack size:	10mg à CHF 190.-- Bulk quantities on request

Product name	Neotame-D5
CAS-No	
Article No.	RCG-368
Formula	C <sub>20</sub> H <sub>25</sub> D <sub>5</sub> N <sub>2</sub> O <sub>5</sub>
Molecular weight	383.49g/mol
Purity	≥98%
Pack size:	5mg à CHF 375.-- Bulk quantities on request

If you are interested in other reference standard material, please do not hesitate to contact us. With our broad knowledge in the synthesis of metabolites and other reference materials we are the reliable partner for you.
